Computer Vocabulary Puzzle

ACROSS

- 3** A way to save the url of a web page that you want to remember.
- 6** Also called Thumb Drive or USB Drive. A convenient way to carry digital files around with you.
- 10** The main screen of your computer which is always behind any application window you open.
- 11** The blinking symbol on the screen that shows where the next letter you type will appear.
- 12** A list of commands in each application, found at the top of the computer screen on Macs.
- 13** A computer that stores information for many other computers. Here at the school, you save your documents on this so that you can get to them from any computer.

DOWN

- 1** The part of the computer that allows you to see what is typed. It looks like a TV screen.
- 2** A utility on our network that keeps content we don't want to see from appearing on our screens.
- 3** An application used to view sites on the web.
- 4** Games, word processors, browsers are examples. Also called software or a program.
- 5** The address of a web site
- 7** A device inside each computer on which all information is saved. This includes everything from the operating system, to software, to documents.
- 8** Where you'll find shortcuts to some of the most popular applications.
- 9** A hand-held device that lets you move the cursor or pointer around your screen as you like so that you can click on links and highlight items.
